

June 2023

Dear Parents/Guardians and students,

The summer assignment for the incoming 6th, 7th, and 8th grade students is used to practice grade level objectives and to improve math performance with word problems. The assignment will be posted on Google Classroom and the school website and will be available throughout the summer. For the incoming junior high students there are 36 multiple choice questions. Students must show work where it is necessary. There will be an answer sheet provided to record the answers on. The work and the answers sheet will be collected the **FIRST FULL DAY** of school. Please number the work with the question it corresponds to. It is important that you make sure your child does their absolute best on this assessment, so the math teachers can see where skills need to be reinforced.

Students will be expected to complete at least 45 minutes a week on iReady. This will be checked at the end of the specified time frame. As teachers, we are able to check the time and what work has been complete through the program. Weekly work will begin on June 26th and end August 6th. Forty-five minutes a week will help reduce what they call “summer loss”.

Have a wonderful and safe summer!
See you in September!

Sincerely,
Junior High Math Teacher
